

HOW TO **THINK** WITH AI

Checklist for AI-Assisted Visual Arts Creation

By Sue Bell
and David Bullock

Checklist

AI-Assisted Visual Arts

1. Define Your Artistic Vision

- Determine the purpose and message of your artwork.
- Identify the style, theme, and color scheme.

2. Select the Right AI Tools

- Research various AI art tools (e.g., DALL-E, MidJourney, DeepArt).
- Experiment with different tools to find the best fit.

3. Set Up the AI Tool

- Sign up and configure your account.
- Upload reference images or examples to guide the AI.

4. Generate Initial Concepts

- Provide clear and detailed prompts to the AI tool.
- Generate multiple initial concepts to explore different interpretations.

5. Review and Select Concepts

- Review the generated concepts.
- Select concepts that align best with your vision.
- Provide feedback for further refinement.

AI-Assisted Visual Arts

6. Enhance and Personalize

- Use graphic design software (e.g., Photoshop, Illustrator) to edit and enhance the AI-generated art.
- Add personal touches and fine details to match your style.

7. Experiment and Iterate

- Experiment with different prompts and settings to create multiple versions.
- Refine and iterate based on feedback and new ideas.

8. Incorporate Additional Elements

- Add text, logos, or additional graphics as needed.
- Ensure the overall composition is balanced and visually appealing.

9. Finalize and Export

- Conduct a thorough final review.
- Export the final artwork, you may need to convert to the desired format and resolution.
